FOR IMMEDIATE RELEASE

TREDEGAR FILM PRODUCTS PRESENTS NEW PRODUCTS AT IDEA '07

RICHMOND, Va., April 20, 2007 – Tredegear Film Products Corporation will showcase a variety of new products at IDEA07.

As a leading global topsheet provider, Tredegear has several new designs for its full range of topsheets. **ComfortQuilt™** is a 3D, apertured nonwoven topsheet. This technology offers a cottony soft feel with faster strikethrough and reduced rewet. It is now available as a zoned perforated topsheet and can be used on baby diapers, femcare and AI products. The zoned material can help to avoid SAP leakage near the leg cuff area of a baby diaper.

ComfortAire™ is a high loft and flexible nonwoven laminate that combines the softness of a nonwoven with the fluid performance of a film, allowing consumers to enjoy protection with comfort. ComfortAire™ is now available in a new design.

As a global leader in elastics innovation, Tredegear Film Products continues the evolution of **FabriFlex™** elastic laminates to meet the changing needs of the diaper industry for high stretch laminates for diaper ears. Tredegear's new FabriFlex™ 500 series of elastic laminates – using its market proven technology – delivers the level of stretch required for large diaper ear applications.

Tredegear also extended its **StretchTab™** laminates line for side tab closure systems. StretchTab™ is produced with Tredegear's proven FabriFlex™ elastic laminates, and can be customized for high, medium or low stretch. StretchTab extends the range with a Y-bond and a pressure sensitive adhesive version. StretchTab is a cost saving and easy to apply solution for upgrading your diapers.

Besides being a strong player in the Personal Care market, Tredegar is also very active and innovative in **other market segments**. At IDEA07, Tredegar will show how its products can be used in other applications including protective apparel (such as protective suits and facial masks), disposable medical products, housewrap, landscaping fabric, wet and dry wipes used in furniture and floor cleaners, and cheese processing filters.

Tredegar Film Products Corporation, a subsidiary of Tredegar Corporation (NYSE:TG), is a major supplier of apertured and elastic materials for use in personal and household care markets, and also produces films for a variety of packaging and specialty markets. Primary applications include diapers and feminine hygiene products. The subsidiary had sales of \$511 million in 2006, and employs approximately 1,200 people at its production facilities in North America, South America, Europe and Asia.
